

## Automatic Daycare Options

In PetExec you have the option to Enable Automatic Daycare. When enabled, daycare services will automatically change at checkout to either the next highest priced daycare or the next daycare service as configured in each daycare services' settings. You can set the length of time (in hours) required to trigger the service change. You have two options with automatic daycare, next highest price or next daycare service.

**Next highest priced daycare** will switch the daycare service from whatever they were signed in with to the next highest price service. This option only works if you have two services and pets should move from the first service to the second service after X hours.

To enable this option begin in the menu → company preferences → application preferences → category = daycare → Enable Automatic Daycare. Enter the value to determine the length of time (in hours) required to trigger the service charge and select "Next Highest Price" in the drop down:

### Maintain Preferences (i)

<b>Category</b>		<b>Filter</b>	
Daycare			
Category	Preference	Status	Values
Daycare	<b>Enable Automatic Daycare</b> When selected, daycare services will automatically change at checkout to either the next highest priced daycare or the Next Daycare Service as configured in each daycare's setting in products and services. Enter the value in the field to determine the length of time (in hours) required to trigger the service change. If selected and left blank, 4.2 hours will be used.	<input checked="" type="checkbox"/>	6  Next Highest Price

[Return to Table of Contents](#)

Example of next highest priced daycare:

You offer half day daycare and full day daycare. After six hours, any pets signed into half day daycare will have their products/services switched to full daycare at checkout.

**Next Daycare Service** will allow you to choose which service your daycare products will switch to after the elapsed time. This option works great if you have more than 2 daycare services.

To enable this option begin in the menu → company preferences → application preferences → category = daycare → Enable Automatic Daycare. Enter the value to determine the length of time (in hours) required to trigger the service change and select “Next Daycare Service” in the drop down:

## Maintain Preferences (i)

<b>Category</b> Daycare		<b>Filter</b>	
<b>Category</b>	<b>Preference</b>	<b>Status</b>	<b>Values</b>
Daycare	<b>Enable Automatic Daycare</b> When selected, daycare services will automatically change at checkout to either the next highest priced daycare or the Next Daycare Service as configured in each daycare's setting in products and services. Enter the value in the field to determine the length of time (in hours) required to trigger the service change. If selected and left blank, 4.2 hours will be used.	<input checked="" type="checkbox"/>	6  Next Daycare Service

Modify your daycare products/services and select the “next daycare service”:

menu → products & services → maintain products or services
