

PetExec 3.7 Feature List

1. **Pet Incidents:** Add incidents to pet records and manage incidents across all pets. Pet incidents can be defined for your business. Option to display incidents along with Pet Advisories throughout the system. Incidents that happen during pets stay will be displayed at checkout.
2. **Employee Notifications:** Weekly email option to employees with summary data. Email, SMS/Text and Internal PetExec notifications of owner and employee activity for employees.
3. **Owner Communications:** App Message option for pet owners for appointment reminders and confirmations delivered to the PetExec App. Changes to the owner menu option, emails, SMS and appmessages can all be viewed now from the Owner Communications Menu option.
4. **Order Lock Down:** Application preference that provides the option to lock down orders so employees cannot make changes to orders after a specified time after order creation.
5. **Camera Video Support for iDogCam Camera Systems:** Ability to integrate with iDogCam camera systems. Assign a camera to a kennel. Owners will have option to view cameras based on their pet's assigned boarding kennel.
6. **New "Deleted Boarding" Email Template & Communication options for boarding:** Added email template for boardings that are deleted. Send email to owner when a boarding is deleted by changing the boarding status and clicking the resend boarding email button. Also new options to resend boarding emails/sms or app messages from the boarding page.
7. **Boarding Count by Kennel report:** Kennel availability by kennel/space and then date range. See how many kennels/spaces are available and scheduled during a date range. Also provides view to which kennels/spaces are scheduled most often.
8. **Two Factor Authentication:** Option for employees and pet owners. 2FA provides an added level of security when signing into PetExec.

9. **Line Item Discounts applied at checkout to services with price changes:** For example, grooming products/services set up at \$0 with the intention of price changes at time of service will now apply line item discounts to the updated price.
10. **[Employee Spreadsheet:](#)** Spreadsheet of active employees and employee type details.
11. **[New Application Preference to Require Username and Password:](#)** Application preference gives you the option to require username and password when adding/modifying an owner.
12. **[Additional service types added to modify product/details:](#)** View boarding, boarding packages, grooming, other packages in the Modify Product Details menu. Helpful when managing your products/services by these service types.

Additional Features/Changes:

Application Preferences

1. 4 new application preference options:
 - Disable Deleting Daycare
 - Disable Boarding Cameras
 - Include Incident Type Icon with Pet Advisories
 - Lock Down Orders
2. Changes made to existing application preferences
 - Email Customers was renamed to Email/App Message customers to coincide with the Owner Communications related to app message option with this release.
 - Owner Portal was renamed to App/Owner Portal and as a result it is now first in the category drop down list.
 - The application preference "Disable Boarding Confirmation Emails" was renamed to "Enable Boarding Confirmation Emails" so that it was consistent with the other email options and if checked emails are being sent. The selections of this preference were updated during the update so there is no impact to how this preference behaves for your business.
