# PetExec 3.8.1 Feature List

The PetExec 3.8.1 update is primarily a systems update, including some bug fixes and internal changes.

1. [PetExec Mobile App 1.3](#).
2. New look and feel to the PetExec login page: (removed the gray background)

3. User Browser Session Changes. Modified the way PetExec browser sessions are handled and moved them into the database. This allows us to use a different server on each request (round robin) and spread the load of our packmates accessing the data across multiple servers. It also allows us to remove a server from the load balancer without forcing packmates off unexpectedly which would require another login.
4. Added error checking to ensure pet owners schedule with the correct company when/if owner is logged into more than one location in different browser tabs/windows.
5. For consistency, added some minor changes to how vaccinations dates are displayed throughout the system.
6. Removed the search field from both the "communication template" and "blastable templates" pages to reduce issues created by autofill options in browsers.
7. Modified the Rebuild Boarding function so that data entered in eScorecards is not deleted (bug fix).

8. Added additional logging to orders processed with the "Clover Mini" payment type resulting in more visibility to the Clover/PetExec integration and allows for better troubleshooting.
9. Added visibility to boarding appointments with associated services (grooming, scheduled services, daycare and add ons) on the boarding coming and going report.

10. Added additional logging for to multiple boarding deposits in the boarding history and order history resulting in increased visibility to settled boarding deposit orders against a single boarding appointment and subsequent order.
11. Additional logging when daycares are scheduled and deleted. (For example, added logging to indicate a daycare that is scheduled via the "Automatically Schedule Daycare" application preference as opposed to daycares scheduled by employees or pet owners.)

Log History - Click for Detail

Date	Modified By	Change
09/18/2020 04:52 PM	PetExec Administration - Dori	Automatically scheduled Reagan for daycare with boarding (ID: 6116273) on 09/18/2020
09/18/2020 04:52 PM	PetExec Administration - Dori	Automatically scheduled Roxy for daycare with boarding (ID: 6116273) on 09/18/2020

12. Added additional logging for tracking individual daycare package uses from sign-in through checkout.
